ORIGIN

Carbrique Barbecue Briquettes are made from the mesocarp of the coconut (coconut shell) which is carbonised, and then compressed into briquettes. Thus it is environmentally friendly being derived from a renewable resource and being 100% organic in its content.

BARBECUE BRIQUETTES

SPECIFICATIONS

Carbrique Barbecue Briquettes last longer and produce a higher degree of heat with no unpleasant fumes and little smoke - unlike coal, coke, wood or other charcoal products. The result is a safe and economical barbecue fire which is suitable for both indoor and outdoor use.
